### Article Extract on Punggol Digital District

Punggol Digital District incorporates green technologies and energy-efficient systems that foster long-term sustainability. Rooftop urban farms, integration of lush green spaces, and a direct link to the Punggol Waterway are part of Punggol Digital District's design to maximise space and create a greener business park. A 1.3km-long Heritage Trail is slated to open in 2026, featuring conserved trees from the area.

Y

Monorail stations where interviews were conducted are denoted by X and Y on the map.

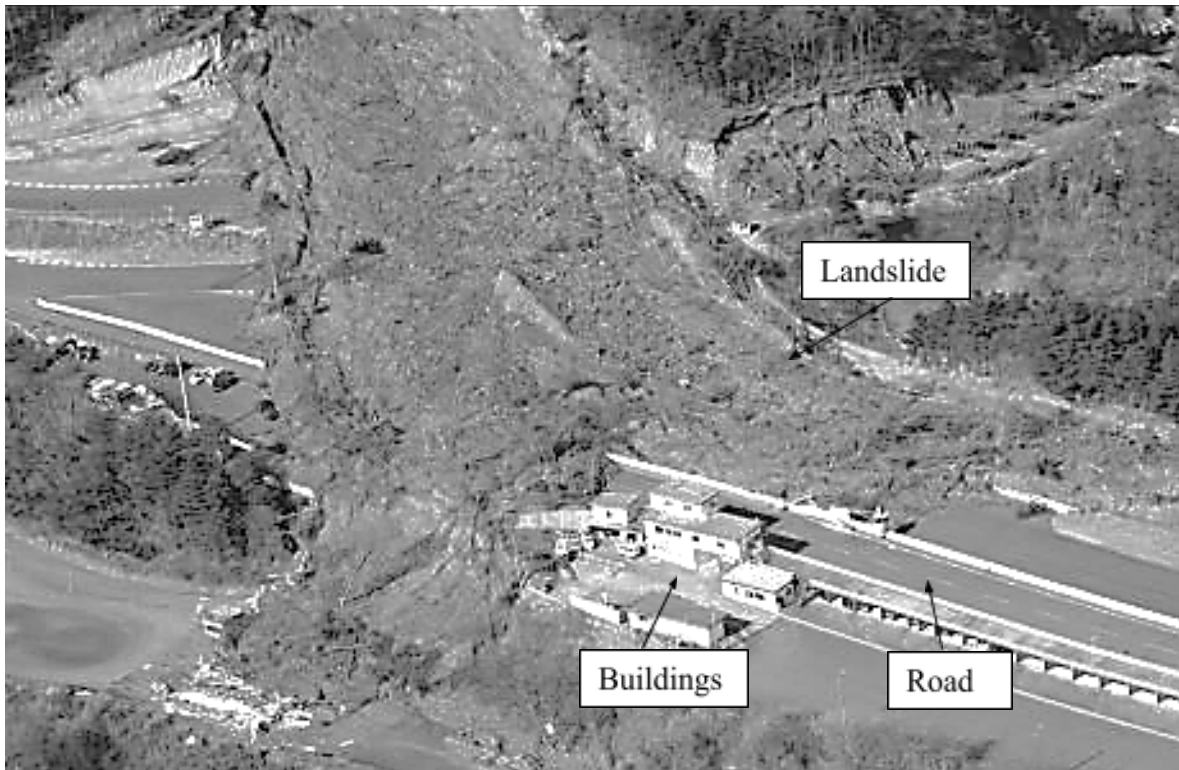

### **News Extract on Tourism in Thailand**

Foreign arrivals to Thailand dropped for the fourth straight month in May 2025, slipping 14 per cent to 2.6 million, government data showed. That is the country's longest streak of declines since 2021, when the Covid-19 pandemic closed international borders.

Thailand has also in recent months contended with an earthquake that showed images of a destroyed Bangkok skyscraper around the world, the rising popularity of Japan and China as regional tourism destinations, and a strong baht that has made it less of a value destination.
